iMed DISTRIBUTORS

iMed Distributors has gone to great lengths to insure that we not only stay ahead of the curve, but have based our products around the South African market to ensure our tests will pick up all common South African compounds found in narcotics which are irregular to other parts of the world, e.g. CAT, NYAOPE, MANDRAX, etc.

Not only are these tests unique, but they are FDA, ISO and CE accredited.

One of SA's most economical tests!

The TB IgG/IgM Rapid Test Device (Whole Blood/Serum/Plasma)is a sandwich lateral flow chromatographic immunoassay for the qualitative detection of antibodies (IgG and IgM) anti-Mycobacterium Tuberculosis (M.TB) in human serum or plasma. It is intended to be used as a screening test and as an aid in the diagnosis of infection with M.TB. Any reactive specimen with the TB Antibody Rapid Test device must be confirmed with alternative testing method(s) and clinical findings.

Product Features:

- Specimen: Blood
- Convenient Test Procedure
- Accurate Results in 5 Minutes
- FDA, ISO and CE certified
- Most economical test

Materials Provided:

- Test devices
- Droppers
- Buffer
- Package insert
